

Integrated Network Solutions Inc. Invited to Technology Assurance Group's 25th Annual Convention Focused on AI-Driven Business Growth

Leading MTSP to Acquire AI Strategies to Help Customers Improve Efficiency, Security, and Customer Experience

SAVANNAH, GA – March 27, 2026 – Integrated Network Solutions Inc., a leading managed technology services provider (MTSP), announced today that the company has been invited to attend the 25th Annual Technology Assurance Group (TAG) Convention, taking place April 26–28 in Las Vegas – one of the technology industry's premier events focused on innovation, collaboration, and the future of business technology. This year's theme, "AI – Embrace, Capitalize, Dominate, Profit," reflects a pivotal moment for business innovation. Artificial intelligence is no longer a future concept – it is actively reshaping how companies operate, serve customers, and compete. For Integrated Network Solutions, attending this milestone event is about one thing: bringing back real-world strategies and technologies that directly improve outcomes for their customers.

"AI isn't about automation or replacing people," said Mike Dodd, President/CEO of Integrated Network Solutions. "It's about helping businesses make better decisions, respond faster, and deliver a higher level of service without increasing overhead. Every single business is looking for ways to do more with less, but few are leveraging AI significantly. We have been educating our customers for quite some time and we're constantly looking for new ways to utilize AI."

Throughout the convention, Integrated Network Solutions will participate and provide insight during

sessions focused on how AI can be applied across service operations, cybersecurity, and internal workflows. A keynote presentation by Matt Mayberry, a two-time Wall Street Journal and USA Today bestselling author, will share unique applications and forecasts on how AI can be used as a strategic thought partner – helping leaders think more clearly, identify opportunities faster, and execute with greater confidence.

"Integrated Network Solutions has always focused on helping our customers maximize their profitability and productivity," added Mr. Dodd. "What excites us about this year's convention is the emphasis on turning AI into real business outcomes – not just theory, but practical strategies that improve profitability, enhance and protect operations, and elevate the customer experience. We're excited to teach what we know to others in the industry, while also gaining exclusive, battle-tested insights from other technology leaders."

"We're thrilled to have Integrated Network Solutions share their expertise and valuable insight with TAG Members throughout the U.S. and Canada," said Brian Suerth, President of TAG. "Integrated Network Solutions is at the forefront and our Members have great appreciation and respect for their knowledge."
